

GREENFIELD SENIOR SCHOOL

BIOLOGY - UNIT ASSESSMENT

Class IX | Time: 45 minutes | Maximum marks: 20

Instructions: Answer all questions. Show working for numerical questions. Label diagrams clearly.

1 (a) Define photosynthesis. [2]

1 (b) Write the word equation for photosynthesis. [2]

2 Explain how stomata help a leaf exchange gases. Include the role of guard cells in your answer. [4]

3 A plant cell is 0.08 mm wide. In a drawing it is 40 mm wide. Calculate the magnification of the drawing and show your working. [3]

4 The table shows the rate of photosynthesis at different light intensities. Plot a line graph and describe the trend. [4]

Light intensity (a.u.)	10	20	30	40	50
Rate (bubbles/min)	4	8	13	16	17

5 State two differences between aerobic and anaerobic respiration in human muscle cells. [5]
